# AvalonBay Makes Commitment to Setting Science-Based Emissions Reduction Targets, Announces Inclusion in FTSE4Good Index

## AvalonBay Joins Leading Companies in Science-Based Targets Initiative

ARLINGTON, Va.--(BUSINESS WIRE)-- AvalonBay Communities, Inc. (NYSE: AVB) today announced its commitment to setting science-based emissions reduction targets to be approved by the [Science-Based Targets initiative](#) (SBTi). AvalonBay joins the growing group of leading companies that are setting emissions reduction targets in line with what climate science says is necessary.

Science-based targets provide companies with a clearly defined path that specifies how much and how quickly they need to reduce their greenhouse gas emissions. The Science-Based Targets initiative is a collaboration between CDP, World Resources Institute (WRI), the World Wide Fund for Nature (WWF), and the United Nations Global Compact (UNGC), and champions setting targets that align with transitioning to a low-carbon economy. Since the signing of the landmark Paris Agreement over three years ago, the number of companies committed to reducing emissions has increased and AvalonBay is proud to join the ranks of these organizations taking action.

“As the cities and markets in which we do business move toward a low-carbon future, AvalonBay has plans to lead the way and contribute positively to this future,” said Tim Naughton, Chairman and CEO of AvalonBay. “We know that fulfilling our purpose of creating a better way to live requires us to continue to set ambitious and innovative goals aligned with climate science, and, as a result, AvalonBay is committed to setting science-based targets.”

AvalonBay was recently confirmed, for the first time, as a constituent of the [FTSE4Good Index Series](#). Created by the global index provider FTSE Russell, the FTSE4Good Index Series is designed to measure the performance of companies demonstrating strong Environmental, Social and Governance (ESG) practices. The FTSE4Good indices are used by a wide variety of market participants to create and assess responsible investment funds and other products.

“This recognition, and the Company’s commitment to science-based targets, demonstrate the strong position that AvalonBay is taking on environmental sustainability and a low-carbon future,” says Mark Delisi, Vice President of Corporate Responsibility.
